**Subject: Kuwait Petroleum Product Range  
for Turbine / Compressor Lubrication  
Your letter WS 86-55 dated June 4, 1986  
Your telexes WS 86-77 C dated 25/7/1986 and  
WS 86-90C dated 22/8/1986**

Dear Sir,

we herewith confirm that the values of oil properties as indicated in your telex WS 86-90C and in your Product Data Sheet for Code 12 Product (dated February 1986) meet the requirements of our oil specification Works Standard No. 800 037 98.

Specificly with regard to the oxydation characteristic acc. ASTM D 943 (DIN 51587) we refer to our Lubricant Specification (attached to our letter of 20.08.1986) where on page 1 the importance of difference between properties of the new oil and minimum requirements for an oil in operation has been particularly pointed out.

We hope to have been of assistance to you and remain

yours sincerely

Code 12 = 08 Strauss
