

Q8 Grease TI

Description

Q8 Grease TI is a special white colored grease based on complex aluminium soaps, containing special solid additives, in particular titanium dioxide which makes this grease suitable for marine applications.

Application

- Q8 Grease TI is a grease dedicated to lubricate bearings, joints and leverages of outboard and inboard boats.

Benefits

- Strong resistance towards water washout in presence of water.
- Excellent lubricity even in difficult conditions.
- Temperature resistance, the very high dropping point guarantees effective performance in a wide operating temperature range.
- Excellent mechanical stability even under severe conditions in combination with a long service.

Properties	Method	Unit	Typical
Consistency, NLGI No.			NLGI 2
Penetration, cone, 25 °C	D 217	0.1 mm	265-295
Dropping Point	D 566	°C	>250
Colour	Visual	-	white

The figures above are not a specification. They are typical figures obtained within production tolerances.
