

Q8 Outboard Synt 3

Description

Q8 Outboard Synt 3 is a synthetic oil, specific for two-stroke marine outboard engines of last generation.

Application

- Two stroke gasoline engines running under high temperature, high load conditions and with lean oil/fuel mixtures (1%-4%).
- NMMA TC-W3
- SAE J 1536 Class 3 (Self mixing in oil injection systems and premix application).
- Q8 Outboard Synt 3 is suitable for leadfree gasoline two stroke engines requiring premixing or having oil injection systems.

Benefits

- Excellent cylinder protection against scuffing wear
- Protection against spark plug fouling and pre-ignition
- Low Ash additive system preventing deposits
- Protection against piston ring sticking and varnish deposits
- Reduced exhaust port deposits
- Excellent rust and corrosion protection
- Suitable for year round use in all climates

Properties	Method	Unit	Typical
Type	-	-	Self Mixing
Absolute Density, 20 °C	D 4052	kg/m ³	888
Kinematic Viscosity, 100 °C	D 445	mPa.s	5.7
Pour Point	D 97	°C	-37
Flash Point, COC	D 92	°C	115

The figures above are not a specification. They are typical figures obtained within production tolerances.
