Hydraulic Oil Approval

Dear Mr. Stoop,

according to the information you send me, Q8 Händel is an antiwear hydraulic fluid and will meet the specification DIN 51524, Part 3 and Vickers requirements M-2950-S (oil recommendation for mobil hydraulic systems).

Referring to the above information the fluid can be used with Vickers products under consideration of our Oil Recommendation for Hydraulic Fluids (D-B-920) and Vickers Industrial Pump Ratings (Guide to Alternative Fluids #579).

It is recommended to maintain viscosity, water content and contamination cleanliness level according to Vickers Systemic Contamination Control booklet.

Best Regards
