**Subject: Approval of Q8 Mahler G8 oil in natural gas application**

N/Ref.: OF 01/06

Dear Mr. Van der List,

We are pleased to communicate that your Q8 Mahler G8 lubricant has been approved for use in GUASCOR engines brand using natural gas as fuel in accordance with product information IC-GD-30-002.

Q8 Mahler G8 oil meets the schedule of maintenance for FGLD and SFGLD engines in natural gas applications, with the properties analyzed within specification according the IO-G-M-25-001(used oil limits values).

This approval has been made thanks to the satisfactory results obtained in testing made since November 2006 to April 2008. The trial was run in a SFGLD560 engine with exhaust manifold dry at 1500 rpm at GUASCOR R & D facilities, according to the protocol for approval of oil for natural gas applications during a period of 3158 hours.

We appreciate the attention and dedication made by Mr. Menendez in this whole process of approval and technical support received from the Netherlands.

Best regards,

Damian Perez de Larraya
