Subject: WG: Withdrawal of A99 based approvals at ZF
Attachments: 3169_93_KuwaitP2.pdf; 3169_93_KuwaitP1.pdf

Dear Mr van de Heijning,

Obviously it seems that in this context we have overseen Q8 T 35 SAE 80W-90 (TUC 3237/93) which accidentally was prolonged again at 3.2.2017 until 18.5.2020.

So I am sorry to inform you that I have to call this prolongation back, and at the same time to withdraw the respective approval.

Kind regards
Lothar Winkler

Betreff: Withdrawal of A99 based approvals at ZF

Dear Mr van de Heijning,

our transmission supplier ZF will withdraw all approvals of products based on 4% Anglamol 99 at the end of this year. Lubrizol should already have informed its customers about that.

As a consequence MAN will withdraw all approvals of products based on 4% Anglamol 99 at the end of 2015. Please find attached the updated approval letters of your approved products.

Kind regards

Dr. Lothar Winkler
